Skills

- JAVA | C | Golang | MySQL | Python (Basic) | Linux | Frontend Development | MongoDB | API | UI/UX | React/Redux | Node.js | Bootstrap | Git |
- Development Tools: Android Studio Using Java | Figma | Visual Studio (Beginner) | IntelliJ IDEA | GitHub |
- Problem solving: Data Structures & Algorithms | Object Oriented Programming (OOP).
- Data Processing Tools: MongoDB.

Project

Website development

React Pokémon App Using Poke Api

- Developed a Pokémon web application using React.js, HTML, CSS, and JavaScript, interfacing with the Pokémon API.
- Integrated Axios or Fetch API for seamless data retrieval, enabling dynamic content rendering based on user interactions.
- Implemented responsive design with CSS3 for optimal display across devices.
- The application allows users to explore and interact with Pokémon data in an engaging manner, providing real-time access to up-to-date information.

WEBSITE TO TRACE THE INDICES OF STOCK AND CRYPTO

- Stock and Crypto Index Tracking Website: Created a dynamic platform using HTML, CSS, and JavaScript to monitor stock and cryptocurrency indices in real-time.
- Leveraged APIs for live data retrieval, offering users current market insights. Designed an intuitive interface with HTML/CSS, enriched by JavaScript for interactive features and chart displays.
- Real-time data integration ensured accurate information, while visualization techniques facilitated informed investment decisions. Software Engineer

Exploding kittens

- Led development of a captivating online version of the popular card game using React/Redux, GoLang, HTML, CSS, and JavaScript.
- Implemented intricate game logic and dynamic user interfaces, ensuring seamless gameplay.
- Collaborated with a multidisciplinary team to integrate real-time features and enhance user experience.
- Leveraged Golang for backend functionality and React/Redux for state management, showcasing proficiency in full-stack development.

Internship

JAVA DEVELOPMENT ----OCTANET

- Java Development Kits JDK includes tools necessary for Java development, such as the Java compiler, runtime environment, and debugger
- Frameworks like Spring, Hibernate, Struts, and others provide reusable components, libraries, and guidelines for building scalable, maintainable, and efficient Java applications

Extra Curricular and Certifications

- Deep dive in java -Internpe
- Java --Hacker Rank
- Java Script(intermediate) --Hacker rank
- Front end web development with react --Presidency University
- Digital marketing --presidency university

Education

Bachelor of Technology

Presidency University Bangalore

2020 - 2024

- Computer Science and Engineering CGPA-7.04

Key Competencies

- Planning and Coordination.
- Effective time management.
- Teamwork and Collaboration.

Declaration :- I do hereby declare that the above information is true to the best of my knowledge.
